

Headset Intercom System, Model C960

Instructions for Programming Headset and Replacing Top, Side and Ear Pads and Mic Windscreen

To program headset:

1. Pull outward on lower right side of base station cover. Lift and remove. (see figure 1).
2. Turn on base station. One of the red channel indicators (1-8) will light, indicating the selected channel.
3. Plug end of programming cable into base station programming jack (see figure 3).
4. Turn on headset. Plug flat end of programming cable into headset programming jack (see figure 2).
5. Audible tones will be heard in the earpiece, indicating that programming is complete. Headset is now programmed to same channel as base station.
